

## REFRACTION SERVICES AND FEES

A refraction is the process of determining your best corrected vision and if there is a need for corrective eyeglasses or contact lenses (additional fees apply). It is an essential part of the eye exam.

A refraction is NOT a covered service by Medicare or most medical insurance plans. These plans consider a refraction a "vision" service not a "medical" service.

Our office fee for a refraction is \$60.00 and this fee is collected at the time of service.

### **Choose one of the options below:**

- I **accept** full financial responsibility for the cost of this service and that any co-payment, co-insurance, or deductible I may have are separate from and not included in the refraction fee.
  
- I **decline** the cost of this service and understand that it will not be performed until payment is rendered.

*I have read the above information and understand that the refraction is a non-covered service.*
